

Publications

Our publications present our work and can address single issues, such as state of air quality, or a set of inter-connected or systemic issues, such as the mobility system. EEA briefings consist of short, online assessments, while our reports (presented as web reports or PDFs) are longer and more comprehensive. This page presents EEA publications by default, but you can adjust the filters to see publications published by the European Topic Centres and on our other platforms.

In the spotlight

**Sustainability of
Europe's mobility...**

**Monitoring report on
progress towards the
8th EAP objectives...**

**Europe's environment
2025**
