

EFRAG submits its Sustainability Reporting Work Programme 2026 to the European Commission

24.04.2026

EFRAG submitted its Sustainability Reporting Work Programme 2026 to the European Commission, setting out its strategic priorities and planned activities. The Commission is under the CSRD required to consult with the Member States and the European Parliament on the Work Programme.

Approved by the EFRAG Sustainability Reporting Board (SRB), the programme confirms EFRAG's continued mandate to deliver high-quality technical advice to support the effective and proportionate implementation of European Sustainability Reporting Standards (ESRS).

Key priorities:

- **Development of N-ESRS** for non-EU groups, with technical advice to be completed by July 2027, after the publication of an Exposure Draft for public consultation in July 2026 for 100 days
- **Continuation of the SME ecosystem**, including support for voluntary reporting and capacity building
- **Implementation support**, driven by stakeholder needs and an ongoing consultation
- **Advancing interoperability** with international standards (ISSB), to reduce fragmentation
- **Accelerating digitalisation**, notably through XBRL taxonomy updates and the Knowledge Hub.

Building on initial ESRS implementation experience and regulatory developments, the programme places strong emphasis on usability, simplification, and burden reduction to ensure the robustness and comparability of sustainability disclosures.

Strategic Priorities & Deliverables

Strategic Priorities	Key Deliverables
 N-ESRS (Non-EU Groups)	- Exposure Draft of N-ESRS - Public consultation (100 days, from mid-July 2026) - Cost-Benefit Analysis - Final Technical Advice to the European Commission (end of January 2027)
 SME Ecosystem & Voluntary Reporting	- SME Forum & ecosystem coordination - VS implementation guides (H2 2026) - Surveys on uptake & emerging markets - Educational materials & training modules - Mapping and assessment of digital platforms
 Implementation Support & Simplification	- Agenda Consultation (July–October 2026) - Market study on voluntary reporting - Design of implementation mechanisms - Targeted materials (e.g. Anticipated ESRS) subject to consultation outcomes - State of Play reports (ESRS & VSME)
 Interoperability	- Comment letters to ISSB, GRI, GHG - Updated interoperability mappings - Stakeholder workshops & technical engagement - Contribution to international standards
 Digitalisation & ESRS Knowledge Hub	- ESRS XBRL taxonomy update - ESRS requirements list (XLS) - Enhance ESRS Knowledge Hub (interoperability) - Digital templates & usability improvements
